

Aapo Harjunpää

Software Developer | ICT Engineering Student

Summary

I am a promising software developer and engineering student with extensive experience, especially in web and game development. I have been programming since 2019, during which I have learned numerous technologies and programming languages. I am currently looking for new challenges and opportunities to grow in software development.

Work Experience

Programmer, Business Tampere (Internship), Tampere

September 2023 - December 2023

In a team of four, we developed tourism websites for the municipality of Pirkkala using WordPress, PHP, HTML, and JavaScript. I was responsible for the API integration of Visit Finland Datahub with GraphQL and maintaining technical documentation.

Cemetery Worker, Pori Ev. Lut. Church Union (Contract), Pori

June 2022 - July 2022

Newspaper Carrier, Suomen Suoramainonta Oy (Part-Time), Pori

June 2020 - July 2022

Education

Bachelor of Engineering in Information Technology, Tampere

University of Applied Sciences

August 2024 - Present

In my engineering studies, I intend to specialize in software engineering. The studies cover various aspects of software development, including programming languages, databases, web development, embedded systems, and software development methodologies.

Vocational Qualification in Software Development, SASKY

January 2023 - May 2024

In my studies, I gained diverse experience in software development, including C# programming, SQL databases, web development (WordPress, HTML, CSS, PHP, JavaScript), and game programming with Unity. Additionally, I have practiced testing, debugging, and project management using the SCRUM methodology.

Finnish Matriculation Examination, Porin lukio

August 2018 - December 2021

Volunteering

Volunteer, Mannerheim League for Child Welfare

August 2015 - May 2018

I participated in events where I provided peer support to children and young people, including a trade fair event organized by the Finnish Red Cross (SPR).
